SUMMARY

Self-motivated & experienced IT Professional & Software Quality Engineer with a strong background in Mobile Devices Testing (Android, iOS/iPadOS & MacOS). Skilled in collaboration across large functional teams to identify and resolve quality issues, improving product reliability and end user quality. Proven ability to develop and execute test plans and test cases, deriving complex test procedures out of business and technical requirements. Knowledge and functional expertise in test automation development, scripting and automating manual scenarios into automated tests.

SKILLS & QUALIFICATIONS

Core Competencies: Manual/Automated Testing, Test Planning & Execution, Test Development for Manual and Automated Testing, Web & Mobile Applications Testing, Customer Analysis, Risk Assessment & Mitigation via Test Design and Development

Tech Stack: Python (Pytest, Automation), SQL, HTML, CSS, JavaScript, React, Node.JS, Jira/Linear, Postgres Database, Linux

Key Strengths: Detail-Oriented, Problem Solver, Organised, Resilient and Adaptable in Fast-Paced Environments in Multiple Industries, Cross-Functional Collaboration, Ability to Drive Large Cross Functional Projects to Completion

PROFESSIONAL EXPERIENCE

Quality Assurance Engineer

TalkTastic / Santa Monica, CA / February 2020 – Current

- Coordinated multiple testing projects, simultaneously running manual as well as automated tests in Pytest to verify system behaviour and evaluated test results with engineering to improve prompt and response accuracy of LLM model powering the app.
- Conducted automated and manual tests on Apple and Android products (iPhones, iPads, Macs, Google Pixel, Samsung Galaxy).
- Collaborated with engineering to troubleshoot and resolve transcription bugs, ensuring alignment with functional requirements by identifying 50+ critical bugs.
- Developed test plans aligned with functional and technical intent to prevent regressions and high impact escapes, leading to high quality app deployments to customers.
- Utilised Jira and Linear for test case creation, defect tracking, and management, improving the bug reporting process as well as system efficiency leading to a 30% reduction in system crashes.
- Prepared detailed reports and provided daily updates on testing progress to engineering and project stakeholders.

Claims Adjuster

State Farm/ Remote / January 2016 – December 2019

- Licensed & self-employed contractor hired by insurance agencies to help automate, review documentation, interview parties involved and determine the validity of a claim, all while specialising in catastrophes (hurricanes, tornadoes, fires, etc.)
- Successfully expedited the resolution of catastrophe-related total loss auto claims by improving the assessment process, reducing average claim processing time by 30%, improving overall customer satisfaction
- Worked with underwriters, appraisers, and legal teams to resolve complex claims, ensuring compliance with company policies and regulatory standards.
- **Notable clients :** State Farm, Progressive, AAA, Lemonade.

EDUCATION

Bloom Institute of Technology

Bachelor of Science Software Engineering
Concentration: Full-Stack Web Development
